

Feedback On SiS Certification – ISO 27001:2022 Certification

Date: 17/08/2026

Greetings of the day!

I would like to express my sincere appreciation to **SIS CERTIFICATIONS** for their professional support and excellent service throughout our ISO 27001:2022 certification process.

We had our audit on **05th August 2026**, and the entire audit process was conducted in a very professional, supportive, and fact-finding manner. The auditors were highly knowledgeable, approachable, and supportive throughout the audit.

We particularly appreciated their practical approach and the way they guided our team by sharing valuable insights into the effective implementation and understanding of the **Information Security Management System (ISMS)**. Their constructive observations and explanations helped our team gain a better understanding of the standard and its practical application.

The overall experience was very positive, transparent, and learning-oriented. We truly appreciate the professionalism, cooperation, and commitment demonstrated by the entire SIS CERTIFICATIONS team.

Thank you once again to **Mansi, Pinky** and the entire **SIS CERTIFICATIONS team** for your excellent support and services. We look forward to continuing our association with SiS Certification for our future certification and compliance requirements.
